

Capital High

Capital High is a thriving school that supports students to discover and follow their pathway to college and a life-fulfilling career.

Students and staff create learning partnerships that not only nurture the student's academic and social/emotional assets, but also promote achievement through personal interests.

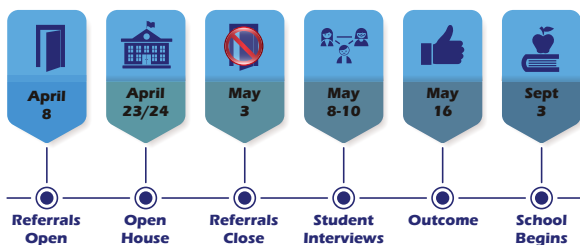

We understand that real learning often comes from getting it wrong in order to get it right. We expect to make mistakes and revise our work multiple times.

At Capital High, we never give up on a student. Most of our students have not found success in a typical school setting, and they are seeking opportunities to re-engage in rigorous learning. With the support of a dedicated staff, students reignite their interest in exploring ideas, rebuild their skills, and restore their self-confidence as scholars.
